### EDUCATION

Bachelor of Technology  
Computer Engineering  
Federal University of  
Technology, Akure  
2016 - 2021  
Akure, Ondo State

### SKILLS

Node.js

Express.js

React,

Firebase

Cypress

jQuery

Vue

Agile/Scrum

Version Control

Automated testing

Linux, Unix

RESTful API

HTML/CSS

Postgre, NoSQL(MongoDB)

### WORK EXPERIENCE

#### Software developer

Silicon Bear

May 2022 - current

- Tested software for bugs and operating speed, fixing bugs and documenting processes to increase efficiency
- Built RESTful APIs that served data to the JavaScript front-end based on dynamically chosen user inputs.
- Produced detailed design documentation, unit test plans, and documented code.

#### Full-Stack Developer

Keeperr Inc

October 2021 - Ferbruary 2022

- Wrote structured, testable, readable and maintainable code. Technology tools used included Node.js, Express.js framework, MongoDB(Database), Vuejs.
- Analyzed systems flow, data usage to validate membership and track digital badges being used.
- Used Docker (CI/CD) to build, deploy and also maintain product.

#### Full-Stack Developer

Perez Gold

March 2021 - November 2021

- Developed features to enhance the user experience while developing and maintaining a responsive user interface with technology such as HTML, CSS, Javascript.
- Developed web services and APIs used in front end development. Technology used included Vue, Node.js, Express.js, Postman.
- Worked in accordance with Agile, attended daily Scrums and working two week sprints.
- Increased the coverage and depth of testing the overall functionality of the system, leading to increased quality and performance.

#### Backend Developer

Amsek Ltd

March 2020 - November 2020

- Created non-technical descriptions of operations and workflow to enable non-coding teams to function with minimal interruption.

- I was responsible for the server-side web application logic and integration of the work front-end developers. Using tools including Vue, Nodejs and Express.js, MongoDB (Database), Postman API
- Developed dynamic and interactive website that ensured high traffic, page views, and user experience.

## Frontend Developer

Home Works (Hackathon)

July 2022 - September 2022

- Built a responsive web application that was connected to the

## PROJECTS

### A Netflix Clone

Creator

- Utilized ReactJS with HTML/CSS (front-end) and NodeJS with Express to build a fully responsive Netflix clone application for streaming and downloading movies on the web.

### Ethereum Transaction Crawler

Creator

- A web application that can allow users to view transaction data on the Ethereum blockchain using VueJs, RESTful, Axios

### Blockchain Based E-Voting System

Creator

- current

- Utilized React.js to help users to interact with the voting system. Assembly.js and web3.js was also required to write the smart contract on the NEAR protocol blockchain

### Video Chat App

Creator

- A web based video chat application that can perform basic video chatting functions. Built using react and Agora UI-Kit.
